REPLIT PROOF OF USE

PaySah | UTeMkuCemerlang | Domain 2

01 Live deployment and public domain

The publishing dashboard shows PaySah as Live, with public access at https://paysah.replit.app.

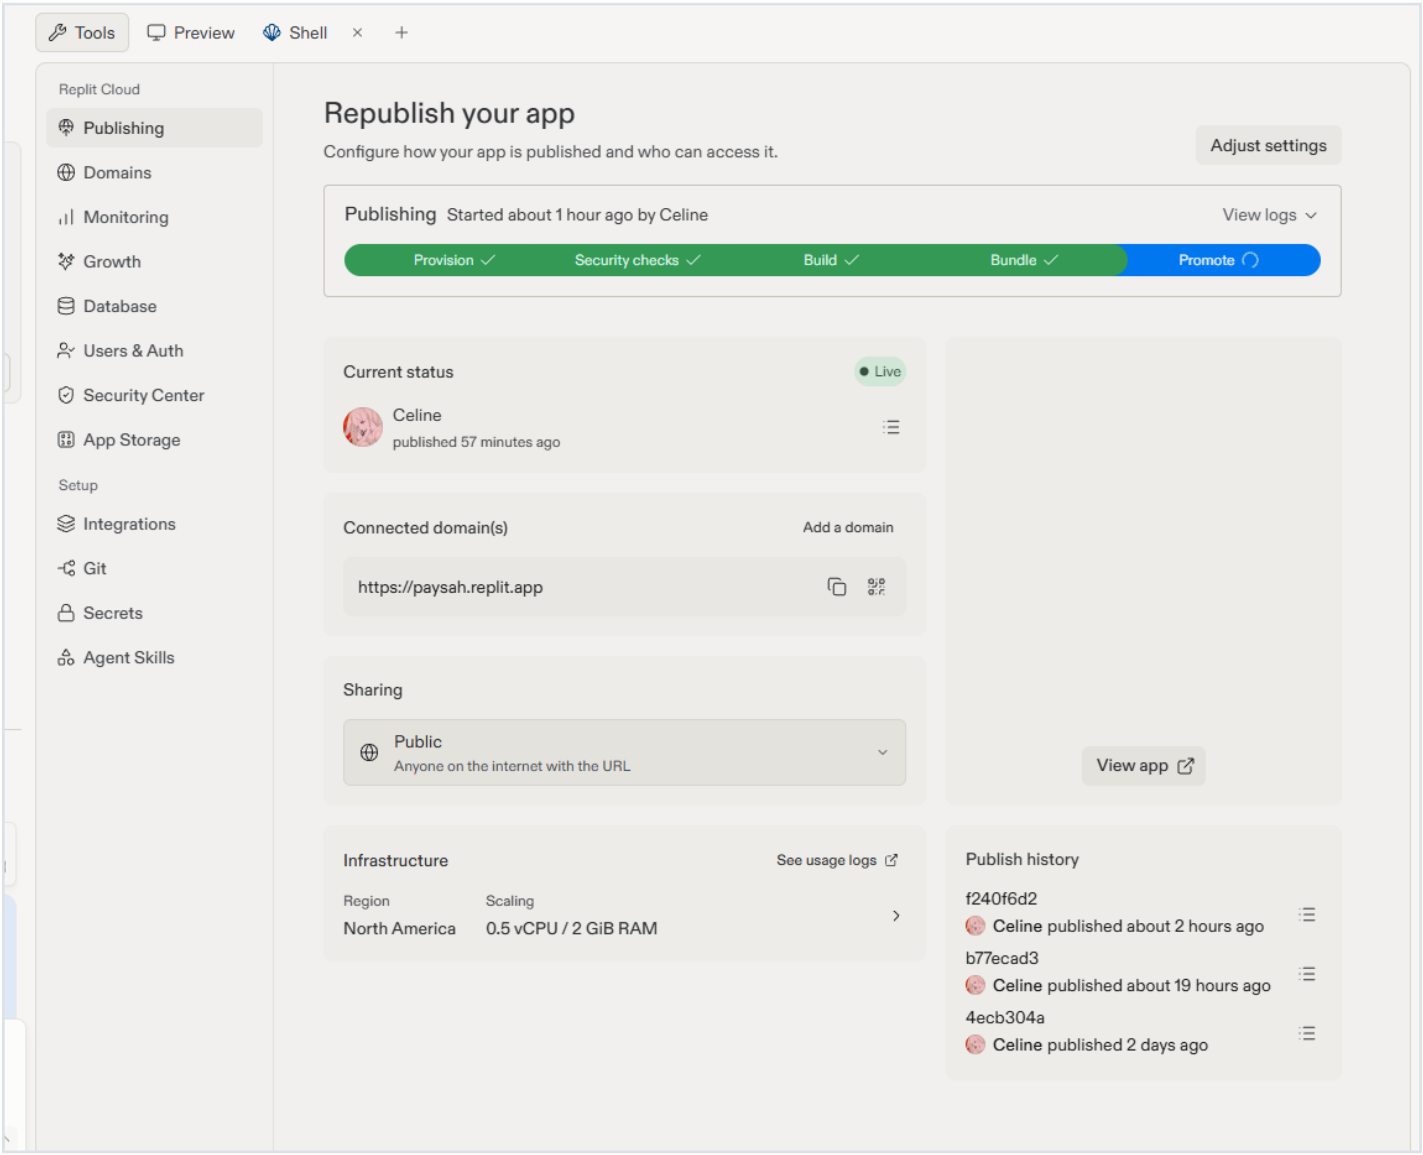

The screenshot records the connected domain, infrastructure and publish history at capture.

02 Publishing workflow

Replit shows completed provisioning, security checks, build and bundle stages during republishing.

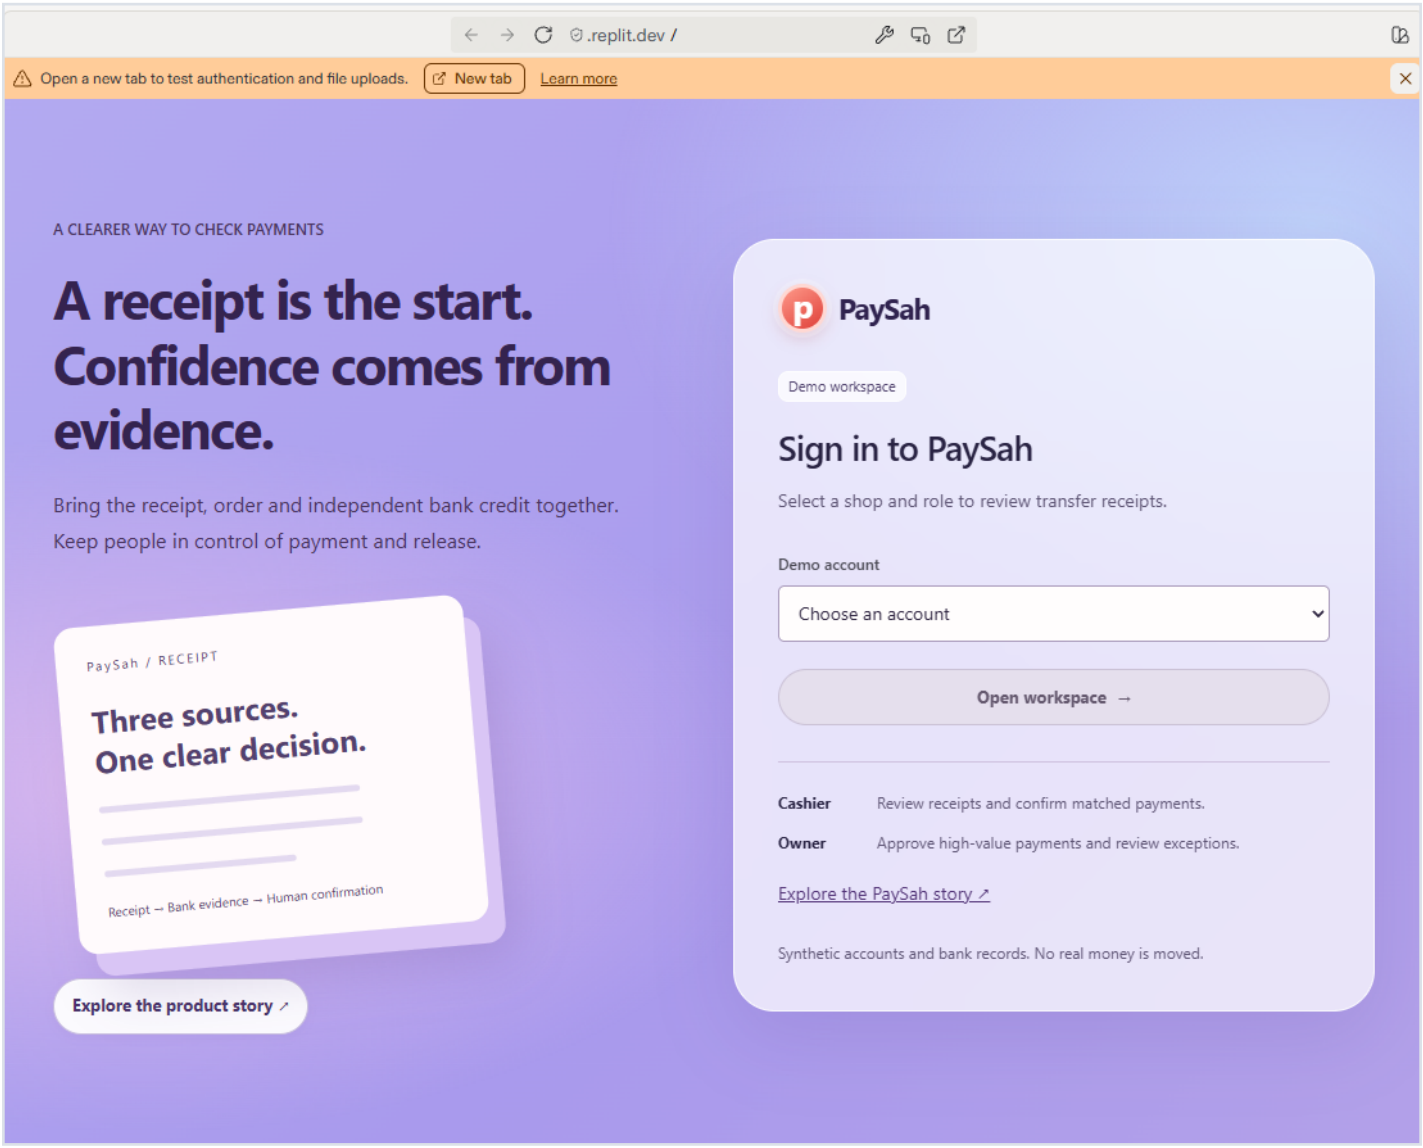

Promote is still in progress in this screenshot; the separate Live panel refers to an existing deployment.

03 Application preview in Replit

The Replit development preview displays the PaySah sign-in interface with Cashier and Owner roles.

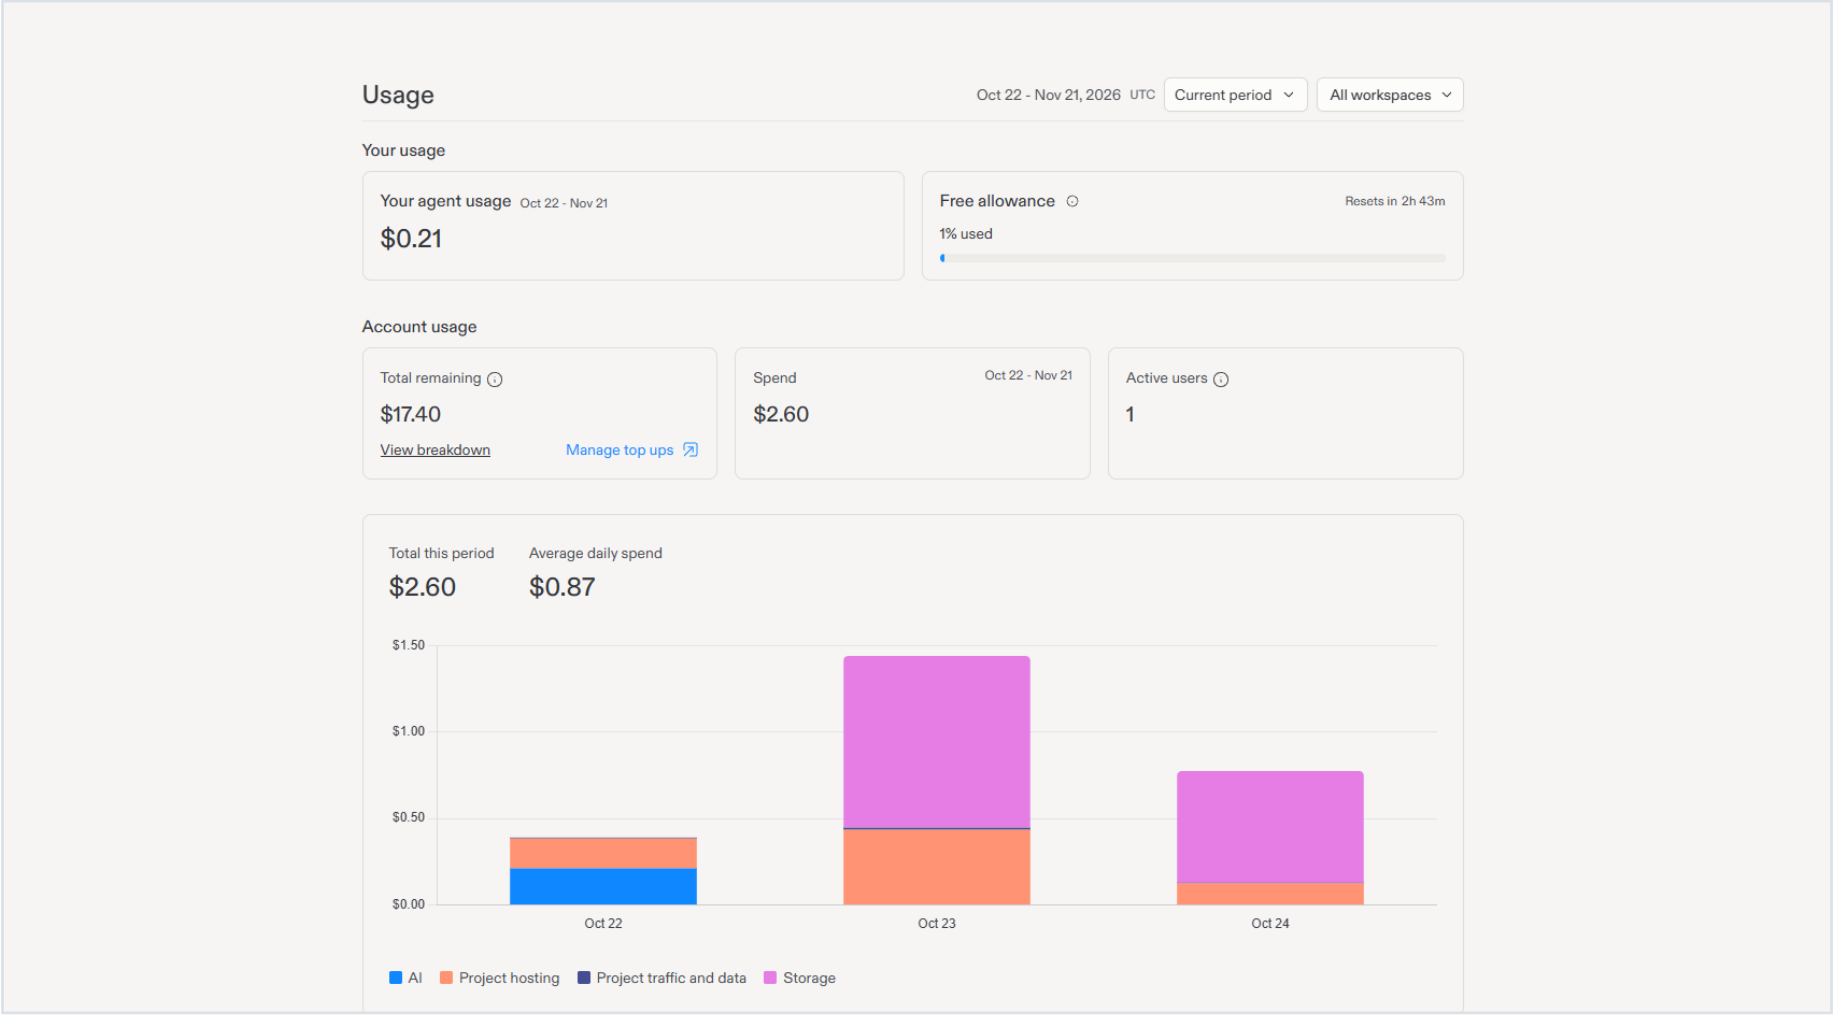

This is a workspace preview, distinct from the public deployment. The demonstration uses synthetic records.

04 Recorded platform usage

The selected account period shows USD 2.60 spend, USD 17.40 remaining and USD 0.21 agent usage.

The filter covers all workspaces. These historical account totals are not an isolated PaySah project invoice.
